

Professional Summary:

Full Stack Developer with 3+ years of professional experience delivering high-performance web applications, with a strong UI focus. Skilled in building reusable, accessible, and scalable front-end components using React and Next.js, while also proficient in backend development with .NET (C#). Adept in Agile environments, DevOps practices, and customer-first development. Strong communicator, self-driven, and committed to continuous learning—including the integration of AI/ML tooling to enhance development workflows.

CORE COMPETENCIES

- **Languages:** C#, JavaScript, TypeScript, HTML5, CSS3, SQL
- **Front-End:** React, Next.js, TypeScript, Tailwind CSS, Mantine, Responsive Design, Jest, React Testing Library
- **Back-End:** .NET Core, .NET Framework, ASP.NET Core, Entity Framework Core, NHibernate, Node.js
- **DevOps & Tooling:** Azure DevOps, Git, Docker, CI/CD Pipelines
- **Databases:** SQL Server, PostgreSQL, MongoDB
- **Methodologies:** Agile (Scrum), TDD, REST APIs, Microservices
- **Cloud & Infrastructure:** Azure, Containerization (Docker), Telemetry & Monitoring
- **AI/ML Tools:** Prompt engineering, GPT-based tools integration (open to learning/customizing ML-powered features)

SOFT SKILLS

- Strong communicator
- Analytical thinker
- Fast learner
- Team player
- Problem solver
- Detail-oriented
- Collaborated with cross-functional teams

EDUCATION AND PROFESSIONAL DEVELOPMENT

- **Master of Science – Information Technology**, Concordia University (2024)
- **Bachelor of Science- Computer Science (Honors)** Ajayi Crowther University (2019)

PROFESSIONAL EXPERIENCE

Habitat For Humanity IT Support March 2024 – Present

Tasks Performed:

- Provided technical support to end-users by diagnosing and resolving hardware, software, and network issues promptly.
- Maintained and monitored company IT infrastructure, ensuring optimal performance, security, and compliance with organizational policies.
- Supported the setup and configuration of new hardware and software systems, enhancing operational efficiency.
- Conducted IT needs assessments and advised stakeholders on technology solutions to optimize business processes.
- Assisted with user account administration, network permissions, and system backups.
- Delivered exceptional customer service by explaining complex technical information in a user-friendly manner.

Alberta Health Services, Edmonton Software Developer Sept 2023 – Feb 2024

Tasks Performed:

- Designed, developed, and maintained secure, high-performance web applications using **C#, ASP.NET Core, JavaScript, and TypeScript**.
- Integrated frontend user interfaces with backend systems to deliver seamless functionality across clinical and administrative platforms.
- Collaborated with UI/UX designers, product managers, and backend engineers to define technical requirements and deliver scalable solutions.
- Identified, troubleshooted, and resolved software defects, achieving a **20% reduction in system downtime** and enhancing application reliability.
- Wrote clean, maintainable code adhering to industry best practices and participated in regular code reviews.
- Created and updated technical documentation to support knowledge sharing across technical and non-technical teams.
- Actively stayed current with emerging technologies and frameworks, recommending improvements for software projects.
- Delivered project milestones on time within an Agile (Scrum) development environment.
- Participated in sprint planning, retrospectives, and regular team communication.
- Built and maintained frontend components with React; ensured accessibility, Reusability, and responsiveness.
- Used React Testing Library to write unit tests for components

Leo Charter Services
Backend (Node JS) Developer
Jun 2023 – Sept 2023

Tasks Performed:

- Designed and implemented RESTful APIs using Node.js, Express, and MongoDB, powering core booking, user, and vehicle services with clean and modular architecture.
- Integrated React for frontend interfaces, enabling seamless communication with backend services and dynamic content rendering.
- Implemented secure JWT-based authentication, session handling, and user role management for the admin and customer portals.
- Participated in Agile/Scrum ceremonies and sprint planning, aligning engineering tasks with product goals for timely feature rollouts.
- Performed regular peer code reviews, refactoring efforts, and performance optimization to ensure speed and scalability under production load.
- Contributed to Docker-based development environments, making local development and team collaboration more efficient.

Deep Blue Energy Services
Software Developer
Sept 2019 – Aug 2022

Tasks Performed:

- Developed and maintained high-performance web applications using **React**, and **.NET Core APIs**.
- Built responsive, interactive dashboards with real-time data visualization using **React**, **Chart.js**, and **WebSockets**.
- Integrated frontend applications with .NET Core RESTful APIs, optimizing data flow and system performance.
- Actively participated in code reviews, ensuring adherence to coding standards and improving overall code quality.
- Managed CI/CD pipelines using **Azure DevOps**, automating build, test, and deployment processes.
- Produced and maintained technical documentation for APIs, workflows, and project guidelines.
- Collaborated closely with product managers, designers, and developers within an Agile environment to deliver on project requirements.
- Troubleshoot and resolved software bugs quickly, improving application uptime and client satisfaction.
- Integrated UIs with .NET Core APIs using Entity Framework Core and NHibernate.
