

Profile:

Innovative and solutions-driven Software Developer with 3 years of hands-on experience in designing, developing, and delivering robust solutions. Specializing in FullStack development using HTML, CSS, JavaScript (React, Node, & Angular), and DevOps practices, I bring a proven ability to analyze business needs, translate them into high-quality technical designs, and implement solutions that meet organizational objectives. Adept at fostering collaboration within Agile/Scrum environments, I am passionate about continuous improvement and knowledge sharing to drive team success.

I hold a master's degree in Information technology from Concordia University, Edmonton. Beyond my academic qualifications, I excel in problem-solving and analytical tasks. I am experienced with test plans, strategy, and procedures throughout the life cycle of a release from specification reviews through to user acceptance. In addition, I possess excellent communications skills, enabling me to collaborate effectively with a cross-functional team to resolve software issues. My dedication to deliver high-quality software, consistently meeting deadlines with each release highlights my dedication to excellence.

Skills:

Technical skills

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, HTML, CSS, TailWind JSON, C#
- **Frameworks and Libraries:** React.js, React Native, Node.js, Express.js, Next.js
- **Open-source Tool kit:** Prisma, ZenStack
- **Database Technologies:** MongoDB, MySQL, PostgreSQL
- **Tools and Platforms:** Google Analytics, Google Tag Manager, Google Search Console, RESTful APIs, NPM, Git, Azure DevOps, Adobe, AWS
- **Testing:** Postman, Jest, Swagger OpenAPI
- **Microsoft platform integration:** Sharepoint, Team,

Soft Skills

- Creativity
- Excellent team player
- Great Verbal and written communication
- Excellent critical thinking
- Outstanding problem solving
- Exceptional Work ethic
- Very good time management, interpersonal and phone skills
- Business Process Modeling, Training Development & Delivery

PROFESSIONAL EXPERIENCE

Habitat For Humanities, Edmonton
IT Associate
June 2024 – Present

Description:

Working at HFH, as an IT Associate. Advising and provide technical support to end-users, resolving hardware and software issues promptly

Tasks Performed:

- Manage and maintain company networks, ensuring optimal performance and security.
- Develop and execute strategic sales plans to achieve and exceed sales targets.
- Identify and qualify new business opportunities through networking, cold calling, and market research.
- Build and maintain strong relationships with clients, providing exceptional customer service and support.
- Conduct product presentations and demonstrations, effectively communicating the value and benefits of IT solutions.
- Assisted customers in selecting IT products that best suited their needs, providing detailed information on features and benefits.

Alberta Health Services, Edmonton
Software Developer
Sept 2023 – May 2024

Description:

Working at AHS, under the web support and collaboration team, on developing and maintaining software application and data on both frontend and backend.

Tasks Performed:

- Collaborated with business units to identify and analyze business needs, developing web-based solutions to meet requirements.
- Applied DevOps, Agile, and continuous delivery practices to streamline project delivery and improve team efficiency.
- Designed and developed solutions using .NET (C#, REST APIs) and the Microsoft Power Platform, including PowerApps, Flow, and Dataverse.
- Customized SharePoint lists and integrated disparate systems with PowerApps, delivering seamless user experiences.
- Documented both Functional Designs (FDD) and Technical Designs (TDD) for simple projects and requests.
- Created business processes and custom connectors using Microsoft Flow, ensuring effective automation of workflows.
- Developed PowerApps models and applied formulas to meet complex business requirements.
- Developed and maintained projects using React, Azure DevOps, and SharePoint sites.
- Implementation of RESTful API as well as API testing using Swagger open API,
- Hands-on experience using Azure DevOps and Git for source controlling and versioning ensuring seamless collaboration on codes.

Leo Charter Services
Backend (Node JS) Developer
Jun 2023 – Sept 2023

Description:

Working at LCS, as a backend developer, working on an E-charter service project.

Tasks Performed:

- Developed RESTful API for an E-charter service platform for car rentals and drives, utilizing Node.js, Express, MongoDB for backend and react for dynamic frontend components.
- Engineered performant systems on Node.js and developed robust backend features Like authentication using JSON web token in Express JS.
- Unit testing using Jest extension in VSCode
- Collaborated with frontend and UI/UX teams to create a seamless, user-friendly website interface.
- Utilized Agile and Scrum methodologies for efficient project management, leading to timely deliveries and improved outcomes.
- Conducted peer code reviews, offering valuable feedback, and ensuring code quality and adherence to best practices.
- Optimized applications for maximum speed, scalability, and efficiency.
- Wrote and maintained database schemas, queries, and procedures, enhancing overall system performance.

Kode Camp
Full Stack Developer
Sept 2022 – April 2023

Description:

Working at Kode Camp on developing an e-commerce website that sells electronics using Node JS, Express, React HTML/CSS Git and other technologies.

Tasks Performed:

- Developed an e-commerce platform for tech gadgets, utilizing Node.js, Express, MongoDB for backend and react for dynamic frontend components.
- Engineered performant systems on Node.js and developed robust backend features using Express.
- Actively participated in API development: developing and implementation of Restful APIs to facilitate communication between components.
- API Testing using Frameworks like Postman, and/or VSCode “REST client” extension.
- Unit testing using Jest extension in VSCode
- Translate simple to medium technical designs into high quality code.
- Implement unit testing, developer level performance testing and support others.
- Wrote high-quality code, with a focus on TypeScript, contributing to the successful delivery of multiple projects. Utilized both relational and non-relational databases for efficient data management.
- Collaborated with frontend and UI/UX teams to create a seamless, user-friendly website interface.
- Utilized Agile and Scrum methodologies for efficient project management, leading to timely deliveries and improved outcomes.
- Conducted peer code reviews, offering valuable feedback, and ensuring code quality and adherence to best practices.

- Optimized applications for maximum speed, scalability, and efficiency.
- Wrote and maintained database schemas, queries, and procedures, enhancing overall system performance.
- Designed, implemented, and maintained secure cloud systems and infrastructure to safeguard the code base.

Deep Blue Energy Services
Software Developer
Jan 2020 – Aug 2022

Description:

Working at DBESL as a Developer and Support Engineer. Developing and maintaining company application and functionalities while providing support on cloud-based IT Service.

Tasks Performed:

- Actively participated in the development and support of internal web applications, focusing on integration and standalone functionalities for the organization.
- Designed, implemented, and maintained secure cloud systems and infrastructure to safeguard the code base.
- Developed and automated reporting dashboards using Power BI and Excel to streamline operational performance tracking.
- Developed and maintained dynamic web applications using React.js, Node.js, and .Net Frameworks.
- Developed new user-facing features using React.js, ensuring a responsive and intuitive interface.
- Development and Testing of API using Postman and REST Client.
- Translate simple to medium technical designs into high quality code.
- Implement unit testing, developer level performance testing and support others.
- Utilized Node.js, Angular, and MongoDB for developing dynamic and responsive web applications.
- Manage and optimize web performance using Google Analytics, Google Tag Manager, and Google Search Console.
- Generate insights using BI tools, Excel, and Google Sheets to guide marketing and UX/UI improvements.
- Interpreted and enhanced business process models to align IT solutions with organizational goals.

EDUCATION AND PROFESSIONAL DEVELOPMENT

- **Master of Science – Information Technology**, Concordia University (2024)
- **Bachelor of Science- Computer Science (Honors)** Ajayi Crowther University (2019)
- **AZURE DEVELOPER ASSOCIATE - (Inview)**
